

# Rania D2 Downlight

An unprecedented approach to exceptional white light

## Dynamic White Light—Distilled

### Native to Portfolio

Redefine how light in the home should feel. Lutron's Intelligent Light Portfolio is designed from the ground up to work seamlessly together, delivering next-gen performance with native wireless control and superior reliability.

### White Light Unlike Any Other

With an innovative three-channel solution, Rania brings a quality of natural white spectrum light unmatched by any two-inch aperture downlight in the market—other than Ketra.

### Exacting Craft

Die-cast aluminum trims are honed to a fine, nearly invisible edge, while a tooled hot-aiming system makes even micro-adjustments ergonomic and intuitive.

## A Next Generation White Light Emitter

### Engineered to Feel Exceptional

Designed to work with the location-aware HomeWorks system, Rania knows where it is in the world, so it can shift its color temperature and intensity to mimic changes in light throughout the day.

### Wide Range of Color Temperatures

From incandescent warmth to midday sun. Rania leverages Ketra's advanced color-mixing technology to bring a broad spectrum of color temperatures to a single light engine—from 1,800K to 5,500K.

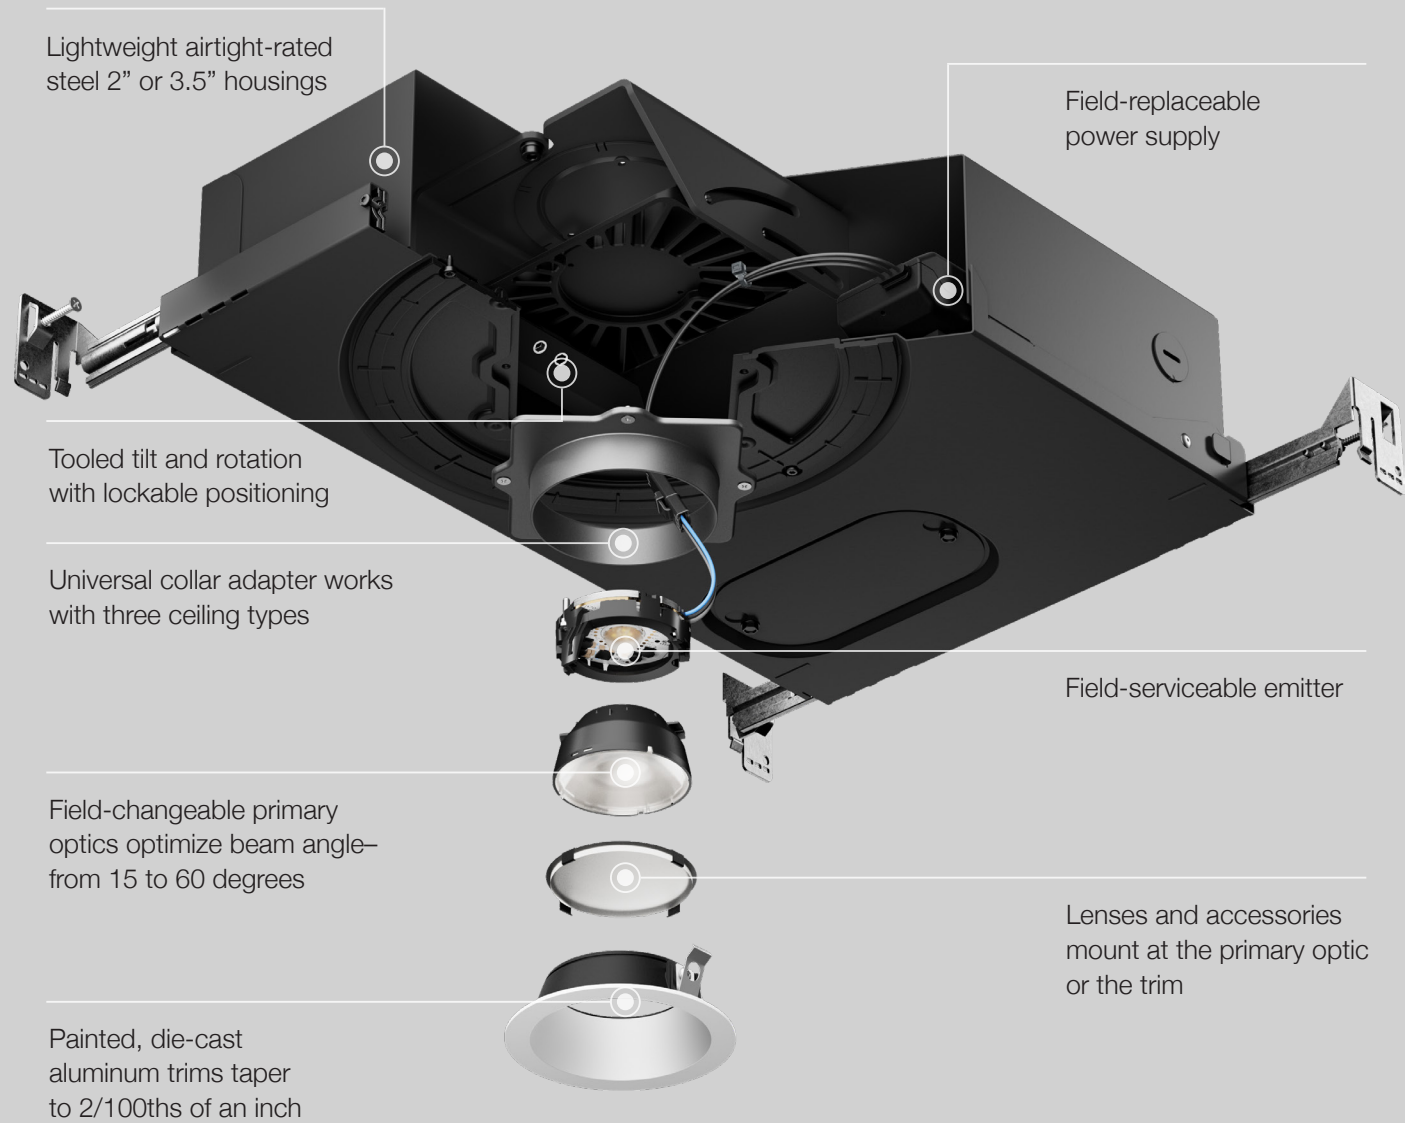

### Uncompromising Innovation

The range of warm dim and tunable white—without compromise. Rania leverages a breakthrough three-channel solution that delivers a wider gamut and replicates natural white light more faithfully than any light source other than Ketra.

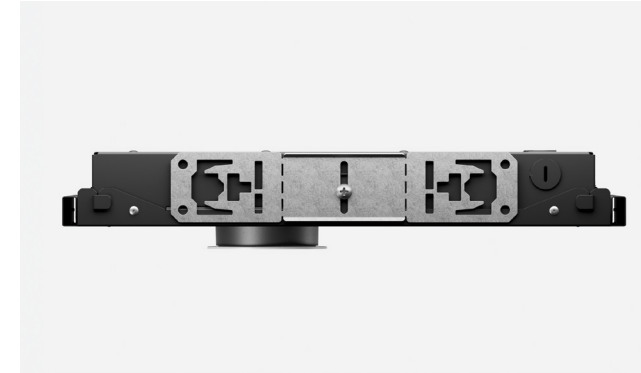

# Anatomy of the Rania D2 Downlight

Using a system of interchangeable parts and components, each D2 downlight can be customized to meet the design and architectural needs of the space in which it lives.

# Two Ultra Slim Housings

## 2" Housing

### Fixed or Wall Wash

Built with an ultra-shallow profile for added ceiling height and the tightest plenum spaces.

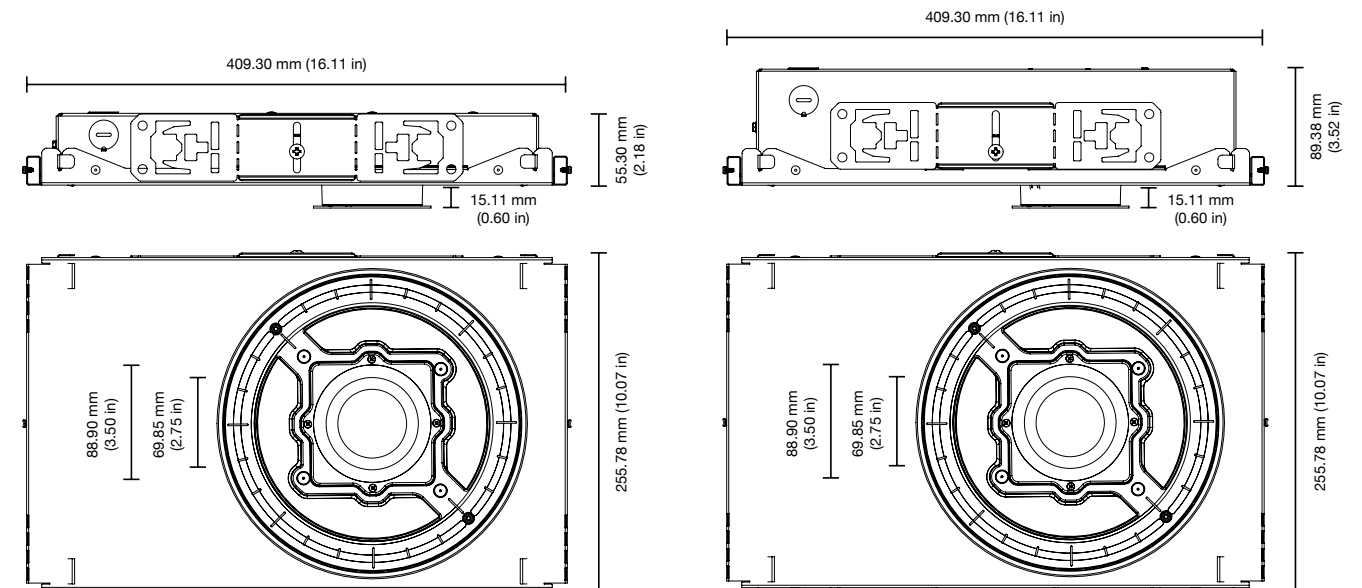

## 3.5" Housing

### Adjustable

Tool-based aiming allows you to showcase your space with precision and adapt to interior design changes easily.
